Scan to Learn More about King County's recommendations to improve indoor air quality.

Breathe clean air and reduce your exposure to airborne viruses and bacteria with the **RGF CAPS Mini** Commercial Air Purification System.

COVID SAFETY PROMO

\$950 FOR UNIT + INSTALLATION

\$600 promotional price for single unit only (without installation).

*Promotional offer is subject to availability. Pricing excludes sales tax, electrical installation (if required) and installation bundle does not include concrete or CMU walls.

Available for Commercial & Residential

The **RGF CAPS Mini 16** Commercial Air Purification System is ideal for most homes, offices, daycares, classrooms, doctor/dental offices, condo/apartment common areas, restaurants, nail salons, pet groomers, veterinarians and more!

Efficient Air Cleaning Technology

Patented technology combines a photocatalytic process and a multiwavelength UV source to create active air purification. This unique combination drives a reaction that produces low level, airborne H₂O₂.

Greatly Improves Indoor Air Quality

Quietly circulates air around the space while creating and distributing low-level airborne hydrogen peroxide (H₂O₂). Testing shows **significant reductions** in viruses, bacteria, mold and odor within minutes of operation, resulting in safe, clean air within the treated space.

Act Now to Save!

The **RGF CAPS Mini 16** Commercial Air Purification System is available for **\$950***.

*Promotional offer is subject to availability. Pricing excludes sales tax, electrical installation (if required) and installation bundle does not include concrete or CMU walls.
